the cambro® story

When William and Argyle Campbell first opened the doors at Cambro Manufacturing in 1951, their goal was to make a hospital meal tray of the highest quality possible. Named the Camtray®, it demonstrated that they were as committed to excellence in the food service industry as they were to the quality of their own products. As 2016 marks the company's 65th year of leadership in quality, innovation and customer service, today Cambro serves the world with the industry's most complete selection of products for widely diverse segments of the food service business.

The future is certain to bring great changes to our industry. Yet one thing that will remain a constant is Cambro's tradition of continually developing new products that help food service operators save time and money, increase sales, reduce labor and improve service. In the years ahead, guided by the commitment of its founders to innovation, quality, and value, Cambro Manufacturing will still be the leader in serving the food service industry and you, our valued customer.

WAREWASHING, HANDLING & STORAGE

CAMRACK® 4-IN-1 WAREWASHING SYSTEM

The Camrack System will protect glassware and keep it clean until the next event, eliminating the need for rewashing.

Efficient Washing

Open inside compartments provide thorough circulation of water and cleaning solutions and promote quick and thorough drying.

Long-lasting polypropylene Camracks are built to withstand chemicals and high temperatures up to 93°C.

Sanitary Storage

Closed outer walls keep fingers and contaminants out and reduce risk of breakage and injury. The Camrack cover and Camdolly make this system completely enclosed. Glassware stays clean when in storage, so operators will only have to wash items once.

Inventory Control

A variety in base rack colors help identify at a glance both contents and quantity per rack. Available in 10 colors.

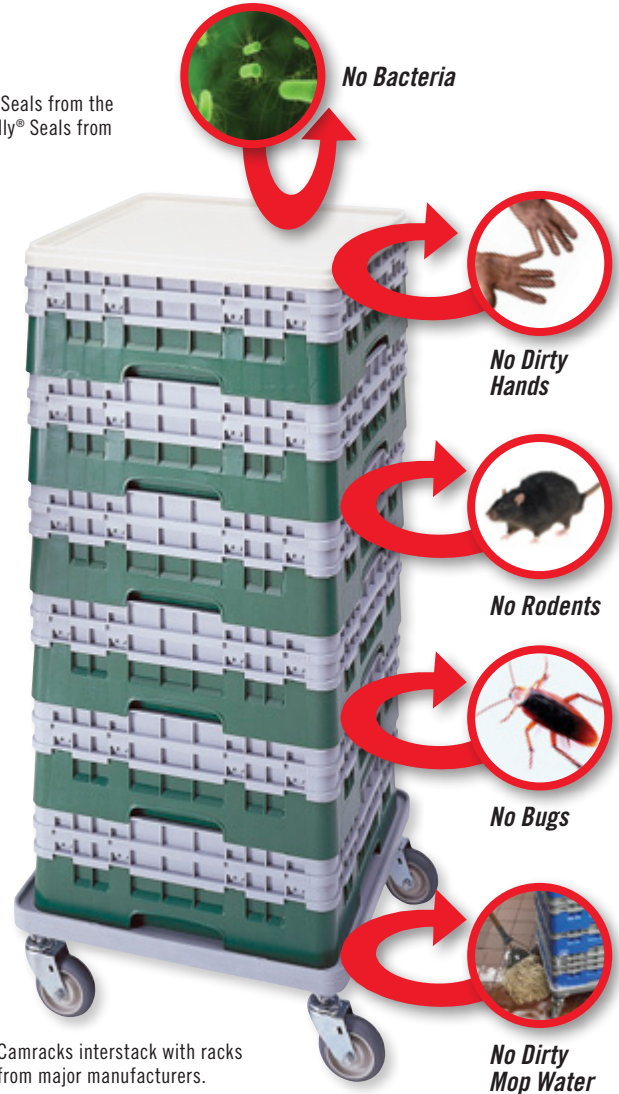

Safe, Sanitary Transportation

Camracks can be transported across large campuses or to off-site locations in one single unit.

Easy to grip handles and smooth overlapping sides facilitate safe handling.

Camrack Cover Seals from the Top and Camdolly® Seals from the Bottom.

Camracks interstack with racks from major manufacturers.

Content labeling options include one-color custom hot stamping or pre-printed clips.

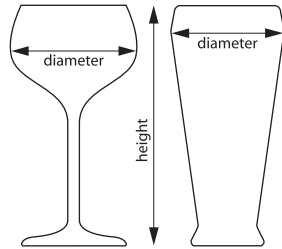

Camracks are covered by one or more of the following patents: Full Base Dish Rack D 412,607. Half Base Dish Rack D 404,176. Half Dish Rack Extender D 400,321. Enlarged Dish Rack Extender D 399,614. Dish Rack with Extender 5,934,486 Utility Patent. Pronged Base Dish Rack D 403,472.

FULL SIZE CAMRACKS® FOR STEMWARE & TUMBLERS

These racks offer complete protection for all your delicate and valuable stemware and tumblers, from washing and handling to stacking, storing and transporting.

Choose the correct dishrack:

1. Measure the maximum diameter of your glass (stemware or tumbler) to determine the number of compartments.
2. Measure the maximum height of your glass (stemware or tumbler) to the top edge of the rim to determine the compartment height.

HIGH DENSITY STORAGE FLOOR TRACK SYSTEM

Maximize storage capacity by creating storage aisles in all available space. This simple system is composed of stationary starter units anchored to a raised floor track system at both ends with high density mobile units installed in between. Easy to install track requires no drilling or gluing.

Increases Storage Capacity Up To

50%

High Density Mobile Units are available with factory assembled post kits, vented or solid shelves and high density casters and bumpers. Full track and extension kits ship complete with required hardware. Stationary Starter Units are required to anchor the system at both ends. Choose from a wide selection of sizes with 4 or 5 shelves to maximize storage space. (See Premium Series spec pages).

Stationary Unit*

High Density Mobile Units

Stationary Unit

Raised Floor Track provides a smooth and level surface to easily roll mobile units. Raised track ensures dirt will not get trapped and is easy to clean. Aluminum track and stainless steel hardware are rust resistant.

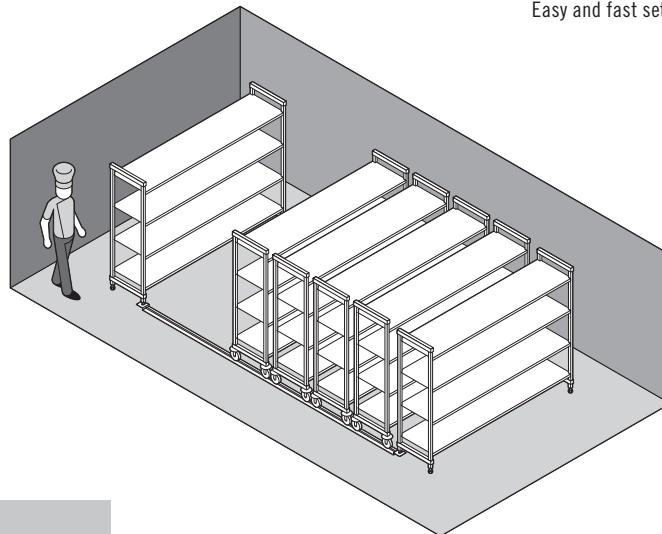

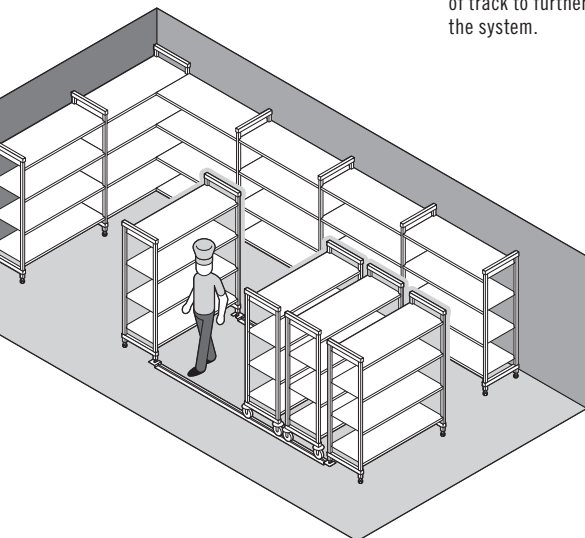

*It is recommended to use a stationary unit for every 4,6 m of track to further stabilize the system.

Grooved casters roll easily and securely on raised track.

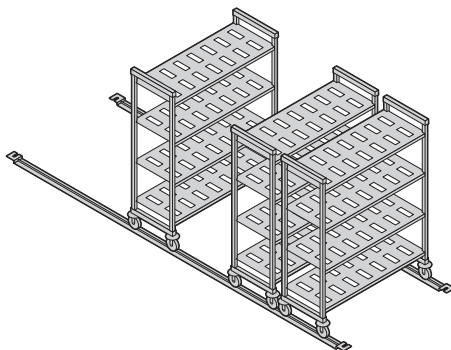

Raised track connects easily to the bottom of a stationary unit that works as a system anchor. No bolts, no glue or drilling into the floor are required. Easy and fast set up.

4-Shelf Vented High Density Mobile Starter Units

Units include 2 factory assembled mobile post kits, 4 shelves, 4 high density casters and 4 high density bumpers. Ships in 1 box.

WHY CHOOSE ELEMENTS?

Made from a revolutionary, extremely strong composite material with a smooth, easy to clean surface. Elements Series is stronger than common wire shelving. It's lighter in weight than Camshelving Premium Series and totally impervious to moisture, chemicals and liquids that can destroy shelving over time. Elements Series is designed for medium to heavy storage use in freezers, coolers, dry storage or warewashing areas. It easily supports the performance demands of a busy foodservice operation.

BASICS PLUS

series

STATIONARY

WHY CHOOSE BASICS PLUS?

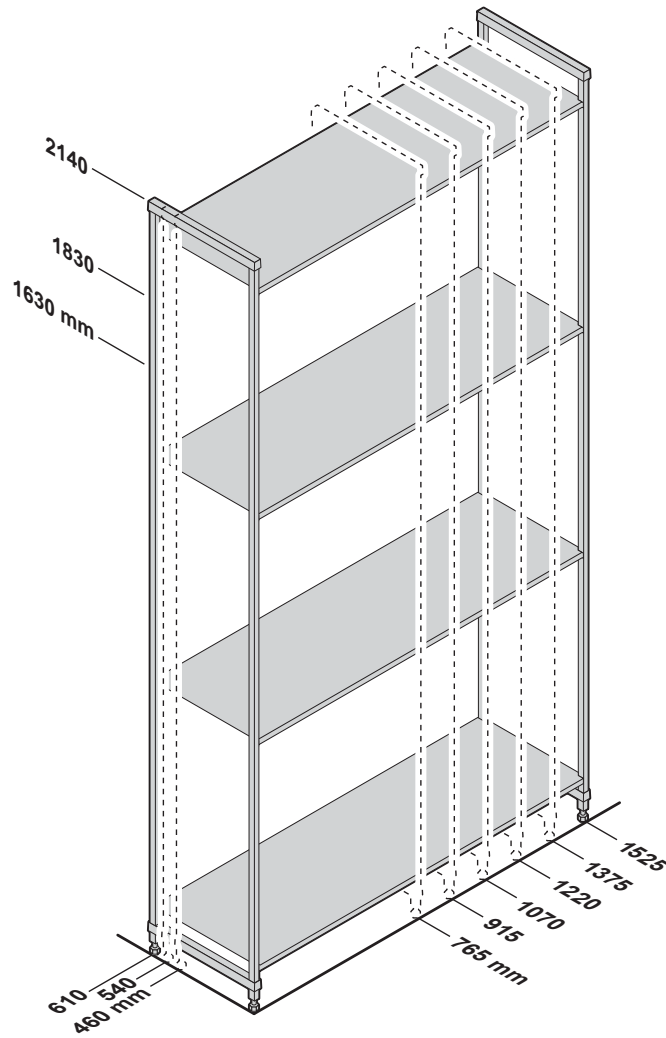

Just because the budget is tight and storage needs are less rigorous, it doesn't mean that shelving performance and storage efficiencies should be compromised. Basics Plus Series is made from the same high performing, strong composite material as Elements Series and has the same design features. It's lighter in weight and less in cost but still strong enough to handle light to medium storage demands.

Post Connectors, Corner Connectors, Floor Fastener, Wall Fastener, Shelf Rails, Single Shelf Security Cage, Shelf Divider Panels and Identification Tags are not NSF listed.

CAMWEAR® GASTRONORM FOOD PANS

Store, transport and serve all in one pan. Camwear food pans are made from durable Camwear that will not crack, bend or dent. Precisely designed to Gastronorm GN specifications, with a bottom to reduce food waste. At half the cost of stainless steel, Camwear pans keep contents as cold as metal pans with less condensation. Pans stack neatly without wedging or sticking.

Camwear GN pans are not recommended for steam table or microwave use. See H-Pan™ section for high heat applications.

Colander Pan is covered by U.S. Patent D 528,376 S.

Uniform 1,27 cm flange ensures a smooth fit in prep tables and food bars.

Virtually unbreakable Camwear withstands temperatures from -40° to 99°C.

Molded-in graduations in standard and metric for easy inventory management.

Won't react with food; minimizes potentially hazardous chemical or acidic reaction.

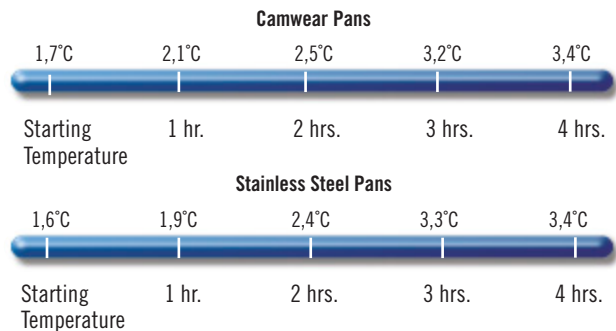

Non-stick smooth interior surface increases yields and promotes easy cleaning.

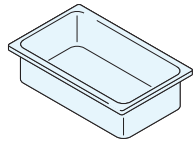

Textured bottoms resist scratching.

Cold Test

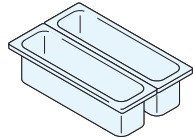

Tests prove Camwear food pans keep products as cold as stainless steel. Stainless steel may feel colder, but as these test results demonstrate, Camwear food pans keep products just as cold for just as long.

Cambro is the global leader in manufacturing trays for the food service industry, offering the largest selection of materials, sizes, colors, shapes and personalization processes. Cambro's breadth of assortment provides the clear choice for the right tray for every need and budget.

Consider the following to select the right tray for your operation:

Step 1: What Will the Tray Be Used For?

In order to choose the correct tray, first identify the correct application.

Service Tray

Used by employees to carry items to serve to guests:

Non-Slip Tray

Used by customers to carry menu items:

Smooth Surface Tray

Step 2: Who Will Be Using the Tray?

To determine the appropriate tray material, it is critical to identify who will be using the tray.

Children

Material type and grade

Tray size

Personalization options

Warranty

Step 5: Personalization

Cambro offers high quality personalization on most of the trays that we manufacture. Look for the personalization logo throughout the brochure. 

Step 6: Additional Features to Consider

Evaluate the importance of the following features to determine the best tray for your operation.

HEALTHCARE

Why Cambro® Healthcare?

For over 60 years Cambro has been focused on developing innovative solutions to the toughest challenges in the foodservice industry. Cambro Healthcare products are designed to perform consistently under the most demanding conditions of healthcare foodservice.

The Components for Successful Meal Service and Patient Satisfaction

Hot Food

The goal of any meal delivery system is to keep food hot and fresh. Safe food handling and preparation are the first steps.

Hot Plate

Hot plate needs a plate heated to 85°-90°C. A plate that is not heated diminishes food quality for patients.

Temperature Maintenance System

Innovative Camduction® heat retention system charges the bases to 75°-85°C fast and efficiently for any facility with a hot tray line system.

Meal Transportation

From meal delivery carts to individual Tablotherm meal transport systems, these products can extend the heat retention of the meal to the patient's bedside.

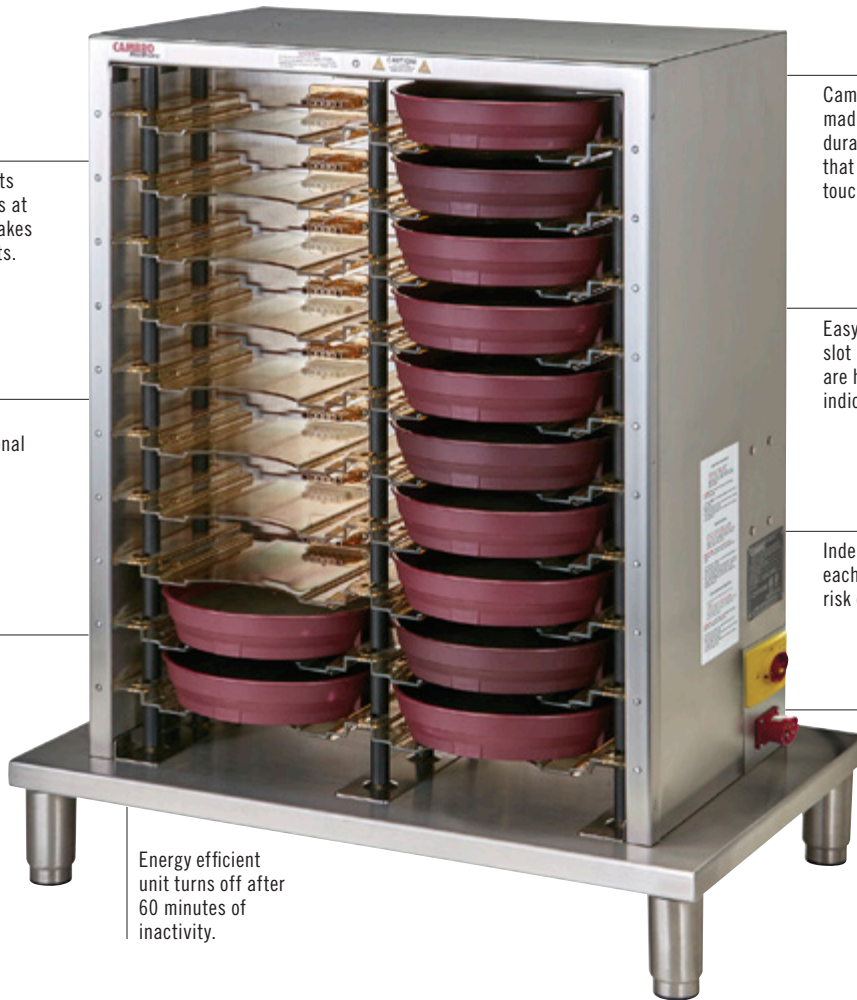

.....
Tablotherm Pellet System achieves temperature retention of 64°C for 2 hours.

CAMDUCTION® COMPLETE HEAT SYSTEM – HOT MEAL DELIVERY SYSTEM

Camduction innovative hot meal delivery system is fast and efficient. Camduction is perfect for any facility with a hot tray line system. One charger can accommodate up to 300 meals per service.

Camduction Charger covered by U.S. Patent 8,263,906 B2.
Camduction Base covered by U.S. Patent D630,897 S.
.....
Camduction Charger comes with 1 year warranty.
.....

1

Quickly and efficiently heats up to 20 Camduction bases at one time. Initial start-up takes approximately 4 - 6 minutes.

Supports up to 5 trays per minute, improving operational efficiency.

Holds hot foods safe at 60°C or higher for up to 60 minutes. Based on voltage supply.

Energy efficient unit turns off after 60 minutes of inactivity.

Camduction charger is made of high-grade, durable stainless steel that remains cool to the touch.

Easy to operate: amber slot LED indicates bases are heating. Green light indicates ready.

Independent functionality of each compartment reduces the risk of service interruption.

Specify cord and plug for country of usage.
